

INSTRUMENT BR 02 - 1000 M

44mm case

1 BR 02 PRO DIAL . Carbon finish steel case - Synthetic fabric strap

BR 02 INSTRUMENT - 1000 M

PROFESSIONAL DIVING INSTRUMENT, WATER-RESISTANT TO 1,000 M

Bell & Ross has made its name as a benchmark in *Haute Horlogerie* and the exclusive world of professional users with watches that totally respond to requirements of extreme conditions.

Indeed, Bell & Ross watches are designed to support professionals cope with extreme temperatures, violent speed accelerations or to resist dangerous pressure levels.

Drawing on their experience in the aeronautical and military industries, master watchmakers, designers and professional users have successfully combined their skills to create a new professional diving instrument.

READABILITY - WATER RESISTANCE

Designed for professionals who require tools with optimum reliability, the **BR02 INSTRUMENT** collection satisfies two basic principles: readability and water resistance.

- **Readability:** To satisfy the extreme conditions of deep-sea diving, the **BR02** watch is fitted with photoluminescent large hands and index to make it easier to read in the deepest and darkest depths. The unidirectional inside bezel graduated to 60 mn and marked by a photoluminescent index also provides optimum reading when submerged.

- **Water resistance:** Guaranteed water-resistant to 1,000 M, the **BR02 INSTRUMENT** can resist extreme pressure levels higher than the standards set by the Swiss Watchmaking Industry. During deep sea diving, its decompression valve balances the pressure inside the case with exterior pressure.

The **BR 02 INSTRUMENT** also provides an optimum comfort. Thanks to the ergonomics of its case and the flexibility and adaptability of the strap.

The **BR02** is the ultimate utilitarian watch; perfectly readable in gloomy conditions and guarantees optimum safety through its measurement diving times.

A precision tool, the **BR02** is not just a reliable instrument ready for any professional diving mission, but an ally of every moment.

INSTRUMENT BR 02 - 1000 M

Steel

2 BR 02 . Steel case
Rubber strap

3 BR 02 . Steel case - Pro dial
Synthetic fabric strap

Technical characteristics

Movement: mechanical automatic.

Functions: hours, minutes, seconds and date.

Case: 44 mm diameter. Satin-polished stainless steel 316 L. Screw-in crowns. Decompression valve for deep sea diving.

Dials: black. Numbers, index and hands covered in photoluminescent coating to optimise night reading. Pro dial version: black dial with large photoluminescent index.

Bezel: Unidirectional, cranted interior bezel graduated to 60 mn with photoluminescent reference point.

Crystal: anti-reflection sapphire.

Water resistance: 1000 m.

Strap: rubber or heavy-duty synthetic fabric.

Price: 3,000 €

INSTRUMENT BR 02 - 1000 M

Carbon finish steel case

4 BR 02 . Carbon finish steel case
Rubber strap

5 BR 02 . Carbon finish steel case - Pro dial
Synthetic fabric strap

Technical characteristics

Movement: mechanical automatic.

Functions: hours, minutes, seconds and date.

Case: 44 mm diameter. 316L glass bead blasted steel with «vacuum carbon» black finish.
Decompression valve for deep sea diving.

Dials: black. Numbers, index and hands covered in photoluminescent coating to optimise night reading.
Pro dial version: black dial with large photoluminescent index.

Bezel: unidirectional, cranted interior bezel graduated to 60 mn with photoluminescent reference point.

Crystal: anti-reflection sapphire.

Water resistance: 1000 m.

Strap: rubber or heavy-duty synthetic fabric.

Price: 3,500 €
